

KLEIN MARINE SYSTEMS, INC. ANNOUNCES SIDE SCAN SONAR – OPERATIONS & MAINTENANCE SEMINAR

Klein Marine Systems, Inc. the leader in Side Scan Sonar equipment is proud to announce a Side Scan Sonar Operations and Maintenance Training Seminar from **June 12-14, 2018**. The three day seminar will be conducted at the Gregg Interactive Learning Center located at the Seacoast Science Center in Rye Beach, New Hampshire. The training will include 2 days of classroom instruction and 1 day of on the water training; lunch will be provided daily.

This seminar is geared to the operator, as well as to the manager, who wants a better understanding of Side Scan Sonar techniques. The course is open to any user of side scan sonar regardless of brand, experience, or occupation. Topics covered will include:

- Basic Sonar Principles
- Types of Side Scan Sonar
- Bathymetry Overview
- Sonar Design
- Basics of Underwater Acoustics
- Interpretation of Side Scan Sonar Records
- Target Detection
- Field Operations
- Specialty Applications
- Troubleshooting
- Maintenance

A sampling of previous customers for the training seminar includes:

- American Underwater Search and Survey
- New York State Police
- NAVO (Naval Oceanographic Office)
- NOAA
- Naval Undersea Warfare Center
- US Army Corps of Engineers
- US Geological Survey
- DeBeers Diamond Mining
- Fugro
- SAIC
- Woods Hole Oceanographic Institution

THE DIFFERENCE IS IN THE IMAGE!!
